Discussion

Strong northwesterlies diminish to strong to moderate this morning in the wake of an intense low. Winds diminish to moderate tonight, then to light westerlies Monday morning under a weak ridge of high pressure.

Good visibility through the period.

Seas near near 1.5 metres this morning gradually subside to near 1.0 metre Monday morning.

Precip Codes: R=rain, RW=showers, S=snow, SW=flurries, D=drizzle, ZR=frzg rain, ZD=frzg drizzle, IP=ice pellets, TS=thundershowers
